High-impact **App and Web Team Lead** with **5+ years of experience** leading cross-functional engineering teams to deliver **scalable mobile and web platforms**. Proven expertise in **architecting systems from the ground up**, including **in-house enterprise solutions (HRMS, CRM)** that significantly reduce operational and vendor costs. Technically strong across the **MERN stack, Flutter, and Python (Django)**, with a demonstrated track record of delivering **enterprise-grade FinTech, AI-driven, and cost-optimized solutions** in the **UAE market**. Combines hands-on technical leadership with execution discipline to drive **performance, scalability, and business outcomes**.

Skills

Languages & Frameworks: JavaScript (React.js, Node.js), Dart (Flutter), Python (Django/Scripting), PHP.

Cloud & DevOps: AWS (Lambda, EC2, S3), Microsoft Azure, Docker, NGINX, Firebase (FCM).

Databases & Storage: MongoDB, MySQL, DynamoDB, SQLite, AWS S3.

Specialized Engineering: 3CX VoIP Integration, WebSockets (Real-time), AI Integration (OpenAI, ElevenLabs), Payment Gateways (Stripe, Google Pay, Mpesa).

Leadership: Agile/Scrum, Team Management (5+ members), QA Strategy, API Optimization, Cost Engineering.

Work history

**Jul 2023 -
Current**

App & Web Team Lead

Century Financial Consultancy, Dubai

Department & Platform Foundation

- Founded and architected the organization's first mobile and web application ecosystem, enabling Relationship Managers (RMs) to manage leads and client calls remotely, resulting in a **40% increase in field productivity**.

Team Leadership & Delivery

- Led and coordinated a 5-member cross-functional team (3 Developers, 1 QA, 1 Support), translating complex business and trading-floor requirements into **technical roadmaps, API optimization strategies, and sprint deliverables**, improving **system response times by 30%**.

Cost Optimization & Vendor Migration

- Designed and executed a strategic migration to Docuseal, reducing annual document management costs by **over 80%** (from **\$11,000/year to \$200/month**) while maintaining compliance and operational continuity.

Enterprise Systems Development

- Architected and deployed an in-house HRMS and Payroll platform, replacing third-party SaaS tools, centralizing employee data, and eliminating recurring subscription expenses.

Quality Assurance & Governance

- Established the department's QA framework, standardizing test case formats and validation processes, achieving **100% test coverage for critical financial and payroll modules**.

Revenue Enablement & Analytics

- Developed real-time financial dashboards using WebSockets, enabling RMs to track client P&L, instrument heatmaps, and peak trading activity, driving a **28% increase in sales efficiency**.

Customer Trust & Communication Systems

- Integrated 3CX VoIP into the Flutter mobile application, allowing outbound calls via trusted office extensions, improving **call-answer rates and lead trust by 35%**.

User Engagement & Retention (Health-Tech)

- Designed and implemented a "Step-to-Earn" engagement module, rewarding user activity with in-app incentives and increasing **daily active user retention by 20%**.

Compliance & Risk Automation

- Engineered Python-based automation for KYC and Transaction Monitoring Systems (TMS), reducing onboarding friction and processing time by **50%** while maintaining regulatory compliance.

Data Integrity & Trading Systems

- Built intelligent MT5 configuration uploaders and Python synchronization scripts, ensuring **99.7% data consistency** between trading platforms and daily operational dashboards.

Operational Efficiency & Onboarding Automation

- Integrated Microsoft Email automation for customer onboarding and notifications, eliminating manual workflows and saving **15+ administrative hours per week**.

Jan 2020 -
Jan 2025

Lead AI & Full Stack Developer

Freelance

Immersive Learning & AI Integration

- Engineered a next-generation VR-based learning platform for Meta Quest 4, integrating **ChatGPT API** and **ElevenLabs** for real-time conversational voice responses, achieving a **90% user immersion score** and enhanced learner engagement.

Game Development & Backend Architecture

- **Served as Lead and Backend Developer for a Flutter-based puzzle game** for a Kuwait-based client, architecting **scalable game logic, real-time scoring systems, and backend services** to support growing user concurrency.

Serverless & Cloud Architecture

- **Designed and implemented high-availability serverless backend using AWS Lambda and DynamoDB**, enabling e-commerce platforms to handle **300% traffic spikes without downtime** while maintaining performance and cost efficiency.

Aug 2022 - Flutter Developer

Jul 2023

YouCloudPay (Sobha Realty), Dubai

FinTech Payment Integrations

- Integrated multi-channel payment gateways including MPay, M-Pesa and orange money enabling secure digital transactions and expanding **merchant reach by 30% across emerging markets**.

Retail ERP & Commerce Systems

- Designed and developed the YouShop ERP platform, implementing QR-based ordering and Firebase-powered real-time synchronization, reducing **checkout friction by 22%** and improving customer throughput.

Dec 2021 - Frontend Developer

May 2022

Technic Mentors

Interface Engineering & Frontend Development

- Developed responsive web interfaces and cross-platform mobile applications, implementing **Google Authentication, RESTful API integrations**, and secure user session flows to ensure performance, scalability, and seamless user experience.

Education

BS: Software Engineering (Gold Medalist)

Gift University

- Best Nucleus Staff Award | Century Financial Consultancy
- Dean's Award (6 Consecutive Semesters) | Gift University

PROJECT SHOWCASE

uPro CRM & In-House HRMS

AI VR Tutor (Meta Quest 4)

Kuwaiti Puzzle Game

RM Trust-Call App

- **Built centralized CRM and HRMS platforms** to streamline **lead management, employee data, and automated HR document generation**, reducing operational dependency on third-party systems.

Technologies: MERN Stack, Flutter, Python (Django), REST APIs

- **Engineered a VR-based AI learning system** with **Meta Quest 4**, integrating **ChatGPT API** and **real-time voice feedback** to deliver immersive, conversational learning experiences.

Technologies: Meta Quest 4, ChatGPT API, ElevenLabs, AI Voice Interfaces

- **Served as Lead/Backend Developer** for a **Flutter-based mobile puzzle game**, architecting **scalable backend logic**, **real-time scoring**, and **gameplay state management** to support growing user concurrency.

Technologies: Flutter, Node.js, Real-Time Data Processing

- **Developed a Flutter mobile application** integrating **3CX VoIP** for trusted outbound calls, combined with **lead-management features** to improve customer trust and engagement.

Technologies: Flutter, 3CX VoIP, REST APIs

CERTIFICATIONS

Feb 2026 AWS Knowledge: Cloud Essentials Badge | AWS Skill Builder

Mar 2026 AWS Certified Cloud Practitioner (CLF-C02)

My Portfolio

1. YouShop App | Multi-Merchant Retail Platform

- **Built an end-to-end retail management system** supporting multiple merchants and stores with integrated digital payments.
- **Optimized user workflows for low-friction adoption**, driving strong usability and platform acceptance across vendors and customers.

2. uPro Web App | In-House CRM & Enterprise Platform

- **Built a proprietary, all-in-one CRM and enterprise platform** centralizing Sales, HRMS, IT, Compliance, and Support, replacing multiple third-party SaaS systems.
- **Delivered \$50,000+ in annual software cost savings**, eliminated per-user licensing, and achieved full ROI within **14–18 months** while ensuring **100% data sovereignty and UAE compliance**.
- **Improved sales execution and visibility**, increasing sales team efficiency by **25%** through custom dashboards and unified client journey tracking.

3. uPro Plus | Mobile CRM & Workforce Enablement App

- **Led development of a mobile-first workforce platform** combining CRM, HRMS, real-time lead alerts, and **3CX-integrated VoIP calling** for field-based Relationship Managers.
- **Reduced workflow friction by consolidating all work tools into a single mobile app**, enabling faster lead response, higher conversion rates, and real-time field visibility.
- **Increased daily app adoption and employee retention** through integrated gamified wellness features (Century Coins and health tracking).
